

# DOSUN laser engraver advantage

Compare to any other brand in China

1. The whole machine including software, Dosun developed by ourselves. No need any other support. (image change the software from some other company, you will find it is difficult to operate, and dosun is very easy)
2. Service team, we have mature service team in China. Also our local service support from Agent. Any time you meet problem, we reach to you in time.
3. Use of high-precision rack transmitting design, fast return back to the start bit after finish engraving. Easy erection, unlimited screen length.
4. Lens which developed by Academic Divisions of the Chinese Academy sciences. Balancing guild rail, make sure from 400mm t- 2500mm, totally automatic adjust. And mistake between 1 to100mm. (As we know, Image cannot print two dot. Their software will bigger the dot when print out. So such kind of fine designs they cannot print well)
5. Tailstock with manual and electric, default electric.
6. You also can tell customer we have the 80% of marker volume, why choose image not dosun.
7. And all the important parts we use famous brand in the world, if such low price, they must just use Chinese local brand.

8. Repeat choice between 400mm to 2500mm, integrate all in one.  
With lens safe anti-collision system, intelligently identify current repeat, make sure proper printing.
9. Adopting parallel guide rail, professional assembly measurement and control, ensure straightness tolerance of rail within 20um, and ensure high imaging quality.
10. Rotate servo motor or general asynchronism motor, wide speed range, test with thermal pater.
11. Water cooling and semiconductor cooling system, optional.
12. 360,720,1440,508,1016 dpi, optional.
13. Paths of diode 16,24,32 optional.
14. High precision encoder from Japan.

I am sure DOSUN is you first and best choice.

Thanks
